100% MADE IN ITALY

3XL47
Height adjustable armchair with 3 actuators

CE

3XL47

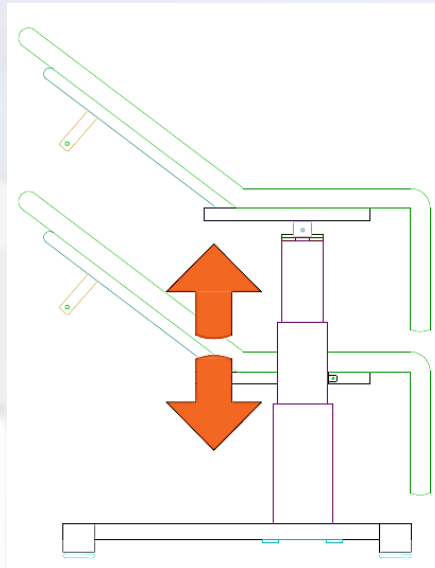

BASIC CONFIGURATION

The armchair is made of metal with remarkable performance characteristics that guarantee the structure stability and robustness. The very strong and resistant central column allows you to adjust the structure in height, its strength is equal to 4000N. The structure has excellent manoeuvrability determined by the use of 3 electric actuators controlled by a button panel.

The backrest is adjustable with an electric actuator and can reach + 75 ° positive and -8 ° negative; the leg cushion also operated by an electric actuator reaches -90 ° in negative and + 5 ° in positive. The armchair is equipped with a roll holder and has 4 adjustable feet which guarantee greater stability.

The base of the very compact structure allows the operator to get closer to the patient, making it very practical and comfortable. The upper surface and the armrests (cm 46 x 13,5) are in foam without seams, with high density; covered in fireproof class 1 IM coated fabric (skai, imitation leather). The spherical joint allows you to adjust the armrests with millimetric precision in any position and also to facilitate patient access they can be rotated in the backrest direction. The density of the rubber used guarantees the patient comfort and correct support during the visit.

The electrical parts comply with current hospital regulations.

TECHNICAL FEATURES

The construction materials are rectangular and round square tubular furniture from Uni 7947/81 and 8913, DIN 2394, threaded bushings in AVP, flat in FE.

The structure follows a process of phospho-degreasing, rinsing and application of the powdered paint cured at 200 °, its minimum thickness is 70/80 microns. The finish is glossy.

DIMENSIONS

Length: 182 cm

Width: 68 cm

Height: 57-98 cm

AVAILABLE COLOURS

OPTIONAL

- A1.M047 - IV pole
- OPT3.3XL47 - Rectangular stainless steel container for instruments
- OPT3.3XL - Retractable wheels kit
- OPT6.3XL - Arch system wheel kit
- 3XLQR - Quick-release (rapid release on the back)
- A5.M047 - Anatomical arm holder with rotating support (cm 35 x 13.5)

CONFORMITY

Class 1 medical device compliant with the requirements of the EEC directive 93/42.

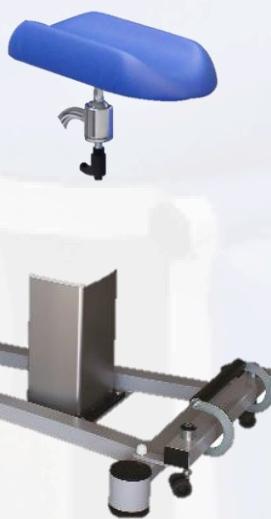

NATIONAL CLASSIFICATION OF MEDICAL DEVICES (CND)

Manufacturer: CALDARA SRL

Code attributed by CALDARA SRL: 3XL47

CND classification: V0802

Progressive number assigned by the system (RDM): 1996414/R
